## Introduction

The Wuhan/Chinese/Covid19 virus event is a fast moving and daily confusing combination of sound bites, often shared to make the speaker look better. This timeline is an attempt to keep the events in order, and to shed some comparative light on all the data being shared.

The 1918 Influenza pandemic killed an estimated 675,000 people in the United States for a mortality rate of 650/100,000. As of July 8, 2022, the Wuhan Covid-19 virus has reportedly involved in the death of 1,010,847 people in the United States for a mortality rate of 308/100,000. The 1918 event therefore was 2 (times) times worse at 650/100,000 that this illness. Of note is the Covid-19 death numbers are likely artificially larger than actual for two reasons. First, Congress paid a 20% bonus medical fees for simply including a Covid-19 any diagnosis, and second on March 24, 2020 the CDC changed how death certificates are filled in by directing that “COVID-19 should be reported on the death certificate for all decedents where the disease caused or is assumed to have caused or contributed to death”. It does NOT have to have been tested for, only assumed. That contradicted the established official guides on how to code a death – listing the primary cause first, then adding any actual contributing causes.

**After spending over \$100 Billion between 2010 and 2020 to for prepare for a pandemic,** the abject failure of the Federal government agencies (CDC, NIH, FDA) as well as many of the US States’ public health agencies response to a viral outbreak is the reason medical treatments were delayed and has contributed to the increase in deaths.

### Key Takeaways –

## Timeline - Covid-19 Virus and related events.

**# 1 The Data presented by the CDC had been artificially changed. The Medical rules on how to list a cause of death were changed twice by the CDC encouraging Covid-19 to be included when existing medical rules and practice did not allow it.**

To amplify the problem, on March 24, 2020, the CDC issued a special Covid-19 exception to the long existing standards on how to fill in death certificates. This change, never made before, strongly encouraged the use of covid-19 as a “potential” cause of death – even if not tested.

Again in May 2021, countries are said to now CHANGE the way COVID deaths are counted from “was tested within 28 days positive”, to only those who die from “an active case of covid”. Changing how the count is done now they claim a treatment.

A peer reviewed, published study has proven the CDC broke many federal laws to change the way COVID data was counted – resulting in a HUGE INCREASE. CDC cooked the books just to create a problem.

**#2 The government payment was boosted with hospitals getting both a 100 billion no strings subsidy, plus increasing Medicare payments by 20% for any case said to include Covid-19, without any proof or testing required.**

If the CDC change (#1 above) had not been enough, progressives in Congress also got into the act and wrote a bonus funding into the law on March 26, 2020 giving hospitals 100 Billion subsidy plus any Medicare payment would be increased by 20% “IF COVID-19” were part of the medical record. Again, it did not need to be tested for, only “assumed”.

Together, these two actions almost guaranteed the reported “Covid-19” numbers would be higher than normal.

**#3 Redefine the medial term “case” to refer only to a test, and use a test method set to ensure a high rate of false positives**

Then, media started calling a test result a “case”. Medically, a “Case”, had been the result of a medical investigation on a person by a practicing medical doctor. It may or may not have tests to confirm it. The change in the definition allowed the variable PCR test, with the CT value set to +40 to be used to drive the propaganda that “Cases of Covid-19” were rampant when in fact they were not. The PCR test with the CT over 30, is known to result in a high number of false positives. Additionally, just having a virus fragment found does not create a “case”, which would require a medical Doctor to examine the person. For many people the virus was naturally delt with by their own creation of anti-bodies – and for others, they already had a preexisting antibody that effectively killed the COVID-19 virus without any treatment.

The CDC and WHO changed the PCR/CT setting recommendation FROM 40 to below 30 in early 2021. (Curiously AFTER the election) This change WILL AUTOMATICALLY REDUCE THE POSITIVE RESULTS. The previous results were FALSE POSITIVES and DID NOT REPRESENT ACTUAL ILLNESS that could be spread. There have been no documented cases of Asymptomatic Covid-19 transmission, and a FALSE POSTIVE

## Timeline - Covid-19 Virus and related events.

person would not have any symptoms. It is also reported that the CDC is still recommending a CT of 40 IF the person HAS NOT BEEN VACCINATED. That would deliberately create FALSE POSITIVES for the unvaccinated.

### **#4 Attempt to deny treatment methods other than a new and experimental mRNA treatment.**

Many other countries used several other existing medicines and got a much lower mortality rate than the US. For example, as of Oct 29, 2021, the US reported a mortality rate of 223/100,000. Mississippi reports a rate of 336/100,000 and is the deadliest US State. Japan reports a rate of 14/100,000. While the US data is over-reported because of #1 and #2 above, this suggests the US public health organizations were not doing their job. See the current list comparing mortality outcome at [www.tebault.org/history/World.pdf](http://www.tebault.org/history/World.pdf)

### **#5 Dr. Fauci promoted and backed Controversial Wuhan Lab gain-of-function work with U.S. Dollars for Risky Coronavirus Research.**

The Wuhan Lab was being paid by Dr. Fauci for “gain of function” research on the bat virus. President Obama had ordered all research stopped in 2014 – but Dr. Fauci ignored that and continued funding his project. The Wuhan lab is most likely the source of the Covid-19 virus. ### **NEW CDC REPORT finds Covid-19 Antibodies in blood donated to Red Cross between December 13 to January 17 of 2019 in nine states. See December 1, 2020 report of CDC.**

The misguided and unconstitutional political action of shutting down economic activities and business, while ordering citizens to stay at home has done the most damage to the American economy. The actual death toll of the Covid-19, for most states, outside the greater New York area in the northeast is lower than the morbidity rate of the 2018 flu season. Notably the current reported deaths may include the CDC-directed use of Covid-19 as the cause of death this year, even if it had not been tested for. Additional pressure to use Covid-19 as the illness was created by Congress giving a financial 20% premium be paid to hospitals for that diagnosis. **Those dual actions will likely serve to inflate the actual counts of treatments and deaths reported.** In the future, statistics should be evaluated to find if the other major causes of death were “mysteriously low” during this Covid-19 outbreak as I suspect.

To better understand how many events, relate, this single timeline was created. People in the Federal Government and some in the media have been at serious odds with President Trump since the 2016 election, as noted first in the Washington Post article below on Jan 20, 2017, announcing a “campaign to impeach...has begun”. Since then, the media and a progressive group in government have been obstructing the work of the government. Some events have obviously had a negative impact on the current ability of the government to deliver the services they should be doing. Future evaluation will find out what actions the CDC, NIH, FDA, and/or many state agencies could or should have taken differently to better address this viral outbreak. The total cost to America of shutting down the economy may never be known nor the damage of ignoring the Constitution and Bill of Rights.

## Timeline - Covid-19 Virus and related events.

Due to the extreme visibility of NJ and NY as a hot spot (the highest rate of all deaths nationwide), I have included the NYC Mayors' public comments that condoned and allowed massive public gatherings to occur for the Chinese New Year's parade two weeks after the President declared a National Health Emergency on Jan 31<sup>st</sup>. Since then the NYC Mayor has been very vocal, criticizing the President and demanding immediate emergency federal help and equipment. In fact, NY State had not purchased medical equipment recommended by their own medical commission in 2015. The commission said it could be needed in case of a severe pandemic. If they had had that equipment on hand, they would not have had to demand immediate federal action. Medical reports now indicate the use of ventilators for this virus is counter indicated, meaning it causes more damage, and this may be why the New York deaths are so much higher than elsewhere.

Another outspoken critic of President Trump is Ms. Pelosi, who's February 2020 actions in San Francisco China Town are included as well. She infamously ripped up the President's State of the Union speech where he warned of the emerging Chinese-modified virus. Her public statements undermining the President to ignoring the danger of the coronavirus, saying on Feb. 24 it was safe to go out in public, when Congress had been briefed in January by the US Intelligence agencies about the possible urgency of the Chinese viral bloom.

There was a good website for state reports of Covid-19 tracking information until March 2021 at <http://covidtracking.com/data>. I used their data by state, creating a summary, and for comparison have include CDC statistics from the 2018 Influenza season. That comparative summary is available at [http://www.tebault.org/history/Covid-Testing\\_2020.pdf](http://www.tebault.org/history/Covid-Testing_2020.pdf).

The reason I am keeping track of these actions is I am a veteran and son of a WWII veteran; I have been raised to understand and respect the US Constitution and the freedom and responsibility it provides to all American citizens. When I left military service, I never stopped working to honor and respect the Constitution.

The society-wide shutdown actions being taken by so many holding power in American now is both a violation of their oath of office and an affront to our liberties Sadly so few seem inclined to defend and protect the Constitution. The attacks on it are so widespread by the majority of State Governors, and

following their mistakes, other state officials fall into line without questioning the illegality of the actions.

This May 7, 2020 editorial by a retired NJ Supreme Court judge and visiting law professor speaks as clearly as can be about the Constitution and how badly it has been violated. I encourage you to read this and consider that the Constitution is the SUPREME LAW of AMERICA and all States in the union.

## Timeline of notable events.

This timeline begins with a 2008 published scientific study showing that natural immunity to the 1918 flu virus was found to be still active 90 years later. The timeline continues through several curious events that have some role in the WUHAN Virus attack. Too many of these events simply cannot be just accidental events, but likely part of a strange plan.

As of 2024, few if any of these criminal actions leading to the deaths of millions have been arrested or prosecuted. In fact, the principals are still being paid and some retired with pensions after their actions.

**However, there are medical doctors in the USA who lost their license or jobs by pointing out the truth and gave their honest medical advice – conflicting with the political draconian rules society was saddled with.**

Aug 19, 2008      **NATURAL ANTIBODIES ARE BEST, AND LAST DECADES.** Researchers find long-lived immunity to 1918 pandemic virus. “The group collected blood samples from 32 pandemic survivors aged 91 to 101. The group found that 100% of the subjects had serum-neutralizing activity against the 1918 virus and 94% showed serologic reactivity to the 1918 hemagglutinin. Anthony Fauci, MD, director of the National Institute of Allergy and Infectious Diseases, said recent studies have projected that immunity lasts several decades”

Dr. Mercola – FAQ Can you spread Covid-19 without having symptoms? The quick answer is probably not. The longer answer is a Jan 30<sup>th</sup> article in JAMA incorrectly stated yes you can, but it has been refuted. The best estimate is when you are sickest and symptomatic you can spread, but not likely at other times. <https://articles.mercola.com/sites/articles/archive/2020/05/20/do-asymptomatic-carriers-spread-coronavirus.aspx>

Could mass testing for Covid-19 do more harm than good?

With Covid-19, however, clinical diagnosis is seemingly a secondary consideration in the face of mass testing. All you require is a positive PCR test; no symptoms, no signs, no other diagnostic proof.

### Reported Statistics and studies.

There are several compilations of statistics on the Covid19 information by state, along with background documents on both the US Government HHS departments who have primary duties in a public pandemic event, along with details of the WHO sponsored annual Influenza vaccine program, managed in the US by the CDC. I have posted several resources to learn more about these subjects. The documents are updates as newer information is made available.

Original projections      Early 2020 government warnings stating over 2,200,000 deaths if nothing is done.

Regarding IHME      The major infection and death models used by the government were from the Bill Gates' Institute for Health Metrics and Evaluation (IHME)  
IHME was created in 2007 by a \$105Million grant by the Gates Foundation. One founding board member was Tedros Adhanom Ghebreyesus, then the Minister of Public Health in Ethiopia – now the head of WHO. The Gates Foundation provided another \$279 Million to IHME in 2017.  
It is noted that Dr Fauci, while not apparently directly associated with IHME, is a senior advisor at the Gates Foundation. The IHME does receive funding from the National Institute of Health, and CDC, but the amounts and purposes are not easily identified. The NIH foundation also receives funding from the Gates Foundation.  
In 2018 the WHO and IHME signed a MOU agreeing to more collaboration. One of the current Board of Directors is Lincoln Chen, of the China Medical Board of Cambridge who gives financial grants to research and medical universities in China.

### Comparison with the 1918 Flu pandemic

April 1917, US enters WWI. April 1918 first cases in US Military seen. February 1919 Influenza almost eradicated in US. It is estimated as many as 500,000,000 people worldwide were infected, with 50,000,000 deaths worldwide. In the US, there were an estimated 650,000 deaths. The US Population was about 100,000,000 at that time, and listed as 106,021,537 in the 1920 Census. An interesting website has stories of this period in America that gives more background at [www.influenzaarchive.org](http://www.influenzaarchive.org)

[The estimated DEATH RATE of the 1918 Flu pandemic in the USA was 650.0 /100,000.](#)

[As of July 2021, the DEATH RATE of COVID is 184.8 /100,000.](#)

The US Census records are interesting during this time. With the pandemic occurring between July 1 1918 and July 1 1919 it appears to show in a lower than normal growth. Apparently even with such a pandemic event the population actually grew in that year. <https://www.census.gov/population/estimates/nation/popclockest.txt> Note the data below has been corrected to reflect both US population, and Armed Services overseas for the years 1917, 1918 and 1919.

Date	Population	Change	% change
July 1, 1920	106,461,000	1,947,000	1.85
July 1, 1919	105,063,000	513,000	.50
July 1, 1918	104,550,000	1,136,000	1.09
July 1, 1917	103,414,000	1,453,000	1.42
July 1, 1916	101,961,000	1,415,000	1.40

### Comparisons with the 2009 H1N1 pandemic

In the one year from April 12, 2009 to April 10, 2010, CDC estimated there were  
-60.8 million cases (range: 43.3-89.3 million),  
-274,304 hospitalizations (range: 195,086-402,719), and  
-12,469 total deaths (range: 8868-18,306) in the United States due to the (H1N1)pdm09 virus.

### Comparisons with the 2018-2019 Flu Season CDC data

In the 2018-2019 Flu season, November 2018-April 2019, was the longest in a decade, lasting 21 weeks. Even still, [high early-season vaccination rates](#) and a [relatively effective annual vaccine](#) appeared to help suppress illnesses. In total, the CDC estimates that up to **42.9 million people got sick** during the 2018-2019 flu season, **647,000 people were hospitalized** and **61,200 died**. That's fairly on par with a typical season, and well below the [CDC's 2017-2018 estimates](#) of 48.8 million illnesses, 959,000 hospitalizations and 79,400 deaths.

<https://time.com/5610878/2018-2019-flu-season/>

### Comparison table with current Covid-19 reports by state to CDC Influenza data from 2018 and 2017

[A table of data to compare the current statistics of Deaths, and Deaths/100,000 to the recent Influenza season](#) data published by the CDC. Most states are well under their Influenza deaths, and death rates/100,000. The Covid-19 deaths being reported from some states include deaths not tested for Covid-19, notably New York had reported adding 2,700 deaths specifically not tested which will throw off accurate data. As the table shows, many states only are experiencing 10-20% of deaths in this covid-19 event, than they do in a typical Influenza season at this time. The Covid-19 season is not yet done. Flu season is generally defined starting in October and going until April or May or about 7 months and the WHO and CDC include both Influenza and Pneumonia deaths in the Influenza season death reports. Influenza only deaths accounts for about 10% of the reported Influenza Season deaths in the USA.

- April 9, 2020 Curious that Dr. Facui stridently objects to use of hydroxychloroquine saying it has not had a controlled study – and only small study plus showed effectiveness. But Dr. Fauci has no problem with the CDC directing doctors to declare death by covid-19 without testing for covid-19 at all – only suspected. Could it have to do with the fact that the hospitals get paid much more if it is a covid-19 patient, or perhaps wanting to inflate the death statistics in an attempt to justify this historic takeover of the country in the name of a medical emergency that facts now show does not seem to be ?

have some infection, but the death rate per 100,000 is below 3, where the hotspots are at 44,24,17, 13 respectively. New testing is confirming less than 1 in 5 test positive nationwide and often 1 in 10. Other nations, like Germany had done random testing, finding a rate of 3.3 per 100,000 and are opening back up. Taiwan, who learned lessons from the SARS outbreak and had a very effective public health plan had almost no deaths. See WSJ article March 13, 2020 above. There is much more damage to America and the economy from the ordered government shutdown than any medical issue that Covid-19 has directly caused. We will not really know the actual deaths caused by Covid-19 itself, because the CDC directive March 24, 2020 (Timeline above) making Covid-19 the cause of death, even without testing. This had never been done by the CDC before in any outbreak – and will only serve to increase the deaths listed for covid-19.

April 13, 2020 Comparison of the COVID-19 statistics to date to the 2018 FLU Season (1 year) data from the CDC reflects the USA experienced a FLU DEATH rate of 17.8 deaths per 100,000 population. Individual state statistics vary, see the state statistics on the current Covid-Testing\_2020.pdf document noted on the opening page.

<https://www.facebook.com/WayneDupreeShow/videos/565333511002518/>

April 15, 2020 More historic facts merge about Wuhan and virus. In 2004 the SARS pandemic was the cause of a virus leak in Wuhan, China. In response, China built a Biohazard Level 4 facility that opened in 2017. The work at the biolabs focused on coronavirus especially from bats. Sadly, we also know the US Government under President Obama provided millions in funding to this Chinese Biolab, and funding continued to today when Congress just called on the Secretary of HHS to stop that funding.

The initial reports stated the new virus was "SARS-Like", and DNA evaluation does show it is very similar to SARS, but has distinct added features that were engineered, not naturally changed in a lab. In 2018 the US government communications expressed concern about the true safety at this new lab. The patient-0 question is still unanswered, but one curious death was of a young employee of the virus lab and the CCP has removed information about her. It is logical to suggest the Covid-19 was lab created, and accidentally released (as SARS was accidentally released in 2004 in Wuhan) to the public. Initial coverups

- April 16, 2020 Sweden has not shut down their country, but has limited large gatherings. Their experienced from covid-19 as of April 15<sup>th</sup> are 12,540 cases and 1.333 deaths – in a country with a population of 10,086,290. That places Sweden at 13.22 covid-19 deaths per 100,000. The 2018 American Flu season reported 17.80 deaths per 100,000. America currently is reporting an overall 8.49 covid-19 deaths per 100,000 average. If we exclude NY and NJ from the statistics, American averages 4.04 Deaths/100,000. So, Sweden without locking down the country, but limiting large gatherings has absolutely beat the 2018 American Flu season. New York has added thousands of deaths, not tested for covid-19 to their totals and are reporting an extreme 62.67 deaths per 100,000 – which exceeds the New York 2018 flu report of 24.41 deaths per 100,000.

- April 17, 2020 Interesting to compare CDC forecast data from March 13, 2020 that was being published in the media, and appears to have been used to justify the lockup of America. The comparison is very telling. The actual results as of April 14<sup>th</sup> data is nowhere near. The infections number used for actual is current testing percentage for covid19 of 19.5% results applied to the US population. The true actual number is likely much less as many states are finding less than 10% have covid19.  
 The actual hospitalization is based on the status reported cumulative hospitalization. The actual deaths of 28,160 is high, because it included deaths where Covid19 was not tested, New York added over 2,700 deaths without any testing. The forecast of 200,000 deaths and an actual inflated current count of 28,160 are VERY Different and have nothing do with a shutdown – see the Sweden note from April 16<sup>th</sup>

April 18, 2020 University of Washington’s Institute for Health Metrics and Evaluation (IHME) again lowered it projection for total deaths from 68,841 to 60,308 (range of 34,188 – 140,381). In March 2020 IHME was predicting over 84,000 deaths. They suggested the range was going to be between 40,000 and 150,000 at the beginning. “That the IHME model keeps changing is evidence of its lack of reliability as a predictive tool,” epidemiologist Ruth Etzioni of the Fred Hutchinson Cancer Center, who has served on a search committee for IHME, said according to [Stat News](#). “That it is being used for policy decisions and its results interpreted wrongly is a travesty unfolding before our eyes.”

Dr. Scott W. This would allow the essential socializing to generate immunity among those with minimal risk of serious consequence, while saving lives, preventing overcrowding of hospitals and limiting the enormous harms compounded by continued total isolation. Let’s stop underemphasizing empirical evidence while instead doubling down on hypothetical models. Facts matter.”

NY Governor Cuomo states during a news conference about the better daily hospital and death statistics - “The number is down, because we brought the number down. God did not do that. Fate did not do that. Destiny did not do that. A lot of pain and suffering did that,” Cuomo said. “And that’s why we lost five pounds, because we went out every day and we exercised and we burned more calories than we ate. That’s how it works. It’s math. And if you don’t continue to do that, you’re going to see that number go back up. And that will be a tragedy if that number goes back up.” Cuomo himself is a self-professed Roman Catholic. I wonder what his parish priest has to say about his rather problematic theology?

- July 24, 2020 Comparing Death Tolls from Covid-19 and the 1918 Spanish Flu.  
These results demonstrate how much more deadly the Spanish flu was than COVID-19 has been so far. In particular, in the United States, deaths due to Spanish flu as a percentage of the population were over 13 times higher than deaths due to COVID-19 thus far.  
  
Although the Spanish flu and COVID-19 are two different illnesses, and although COVID-19 is still ongoing, these disparities in mortality statistics as a percentage of these countries' populations are a testament to how societies have evolved over the past century.  
  
In the United States, for example, over the past hundred years, life expectancy has increased more than 40 percent, and per capita real income in the U.S. has increased over 500 percent.
